

What is Zenergy ?

Zenergy is a next-generation utility and technology company operating in the emerging smart controls and essential commodities conservation industries. The utility industry is based upon a 100-plus-year-old business model.

At Zenergy, we believe that this outdated model is not reflective of what customers want and need today and most certainly does not address the needs of tomorrow.

Zenergy's mandate is to be the Virtual Utility for commercial, industrial, and municipal customers of electricity, natural gas, and water – this means that we ignore the archaic hurdles of the outdated model and bring to your business, county, city or school district, smart cost-efficient environmentally-responsible solutions – in the most fiscally responsible manner possible.

**Advisory &
Energy Roadmap**

Most of the U.S. energy grid was built in the 1950's and 1960's, while demand for electricity has been doubling every 20 years.

The Zero Cost Program™ enables customers to think beyond the archaic inefficiencies of the century-old utility

About Us

- Over 100 Years of combined industry experience
- Service Coverage Area: Continental U.S.
- Conservation, Modernization & Infrastructure
- Mission Focused: Reducing the nation's carbon footprint

The Zero Cost Program™ & What it Means to our Clients?

While many people view the topic of “energy conservation” as boring and tiresome the reality is that there is a myriad of proven scientific tools that, if adopted in mass, would allow us to reduce energy consumption so much so that entire fossil-fuel based power plants can be retired. Additionally, a reduction in consumption of this magnitude would also assist in reducing congestion and transmission problems currently affecting the grid.

Whether you believe in “climate change” or not; everyone can agree that good stewardship combined with bottom line savings makes good business sense.

Many stakeholders view such initiatives as simply too impractical, unattainable and or too costly. Zenergy has adequately addressed all of these concerns through its trademarked Zero Cost Program™.

Benefits of the Zero Cost Program™

- Reduction of Operating Expenses
- Improved Budgeting
- Real Estate Assets: Increase in Net Operating Income (NOI)
- Increase in Enterprise Value
- Achieve Sustainability & Environmental Goals (at Zero Cost)
- Off Balance-Sheet Transaction (Services Agreement)
- Avoid CAPEX expenditures
- Reduce Maintenance Cost and Wear & Tear on Equipment
- Zenergy Guarantees the Reduction in Consumption
